### Dynamics 365 Business Central: The Transformation from Dynamics NAV

Microsoft Dynamics NAV is a powerful ERP solution that has been revolutionized into **Dynamics 365 Business Central** to meet modern business demands.

Microsoft ensures that Business Central retains the capabilities of Dynamics NAV and offers advanced tools to manage supply chain, finance, operations, sales, and customer service.

Now, it has become an all-in-one cloud-based ERP (Enterprise Resource Planning) solution capable of streamlining different business operations while eliminating data silos.

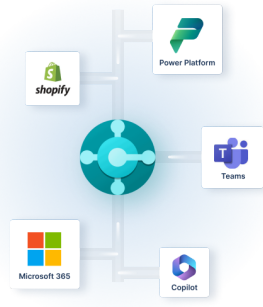

Going from Dynamics NAV to Business Central isn't just a name change. With Dynamics Business Central, Microsoft enables businesses to leverage cloud technology, leaving on-premises systems behind, to achieve greater levels of growth, flexibility, and scalability.

### Why Upgrading NAV to Business Central is Essential?

Moving from Dynamics NAV to Microsoft Business Central is like trading your Pentium 4 with an i7 system. Business Central comes with advanced tools and capabilities that Dynamics Navision could not cater to.

Microsoft Dynamics 365 Business Central empowers you to access cloud technology, mobile apps, seamless integration, high-end security, real-time data, and more limitless features. Also, it is flexible and

scalable, which allows you to scale the system's performance without any hassle whenever needed.

- ✓ It comes with embedded cloud technology
- ✓ Enhanced system scalability and flexibility
- ✓ One-click integration with Extension technology
- ✓ Maximized data security
- ✓ Built-in automation tools and workflows

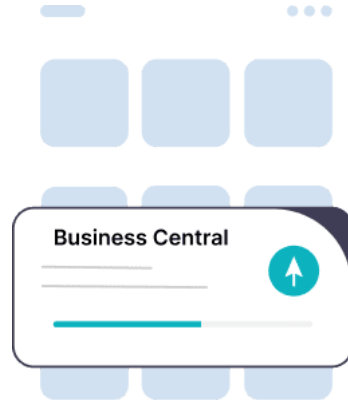

### Do I Need to Upgrade to Business Central?

As we know, Microsoft is soon going to end mainstream and extend support for all its NAV versions. It means Dynamics NAV will no longer receive system updates or upgrades to meet changing business demands impacting business performance.

However, upgrading to Microsoft Dynamics Business Central is not mandatory but is highly recommended for growing businesses. If you are still using NAV, you may miss:

- ✓ Latest security updates to eliminate any cyber-attack
- ✓ Modern tools and capabilities for consistent growth
- ✓ Cloud features to lower operational and maintenance costs
- ✓ Seamless integration with the Dynamics 365 ecosystem

However, regardless of the **Microsoft Dynamics NAV** version you are using, we are here to offer unconditional support to resolve issues and help you grow continuously.

### What is the Right Time to Move from NAV to BC?

There is no such thing as the right time to move from NAV to BC. However, you might be in some situations that are giving you the signal to **upgrade to Business Central**.

- ✓ The mainstream support of your Dynamics NAV has ended
- ✓ Extended support isn't enough for your business demands
- ✓ Unable to comply with changing regulatory compliances
- ✓ Higher cost is restricting you to enhance system performance
- ✓ Data security has become an important concern
- ✓ System complexity is stopping you to integrate new solutions

These are some of the major concerns we hear from our existing customers when they are ready to upgrade. However, you might be dealing with some specific issues. In such a case, feel free to **contact Business Central experts** and get your growth back on track.

**NAV support is fading fast. Don't wait, upgrade to Business Central before it's too late!**

Upgrade to Business Central Today!

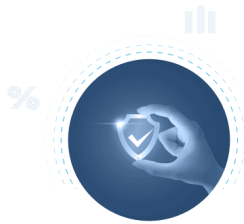

## Is Business Central Expensive?

You might find the initial implementation cost to be expensive, but in the long run, **Dynamics 365 Business Central is expected to give 162% ROI** as per **Total Economic Impact from Forrester Consulting**. This number is huge and lets the business invest the money in the right direction rather than maintaining an existing system.

Also, delaying the upgrade can increase the overall **Dynamics 365 implementation** cost by 15%, as Microsoft releases the updates twice a year, which makes the NAV to Business Central upgrade a bit complicated.

Once you upgrade to Dynamics Business Central, Microsoft will take care of all updates, upgrades, bug fixes, and patch installation automatically, without any cost.

**If you have to upgrade tomorrow, why not start the process today? This smart decision will save a lot of money and resources that can be invested in business growth.**

## Sensitive Data? No Problem! Secure Data Migration Solutions for All

Businesses are now more concerned about the safety of their data because it has become an asset, and there are numerous risks associated with transferring the data from Dynamics NAV to Dynamics 365 Business Central. Such issues include:

- ✓ Compatibility issues
- ✓ Operational downtime
- ✓ Potential Loss
- ✓ Integration with other systems
- ✓ Carryover customizations

Dynamics Square assures you risk-free transfer of your data to the new system while keeping your entire information confidential. Also, we will make sure not to disrupt your existing business operations.

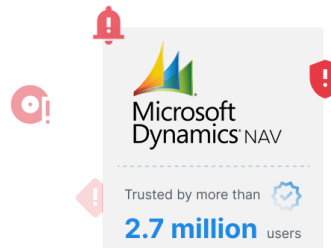

## Dynamics NAV is Working Fine! Why should I Upgrade?

We understand that **Dynamics NAV** is your partner in growth and has helped you achieve goals and grow your business. But when it comes to adapting to modern business demands and dealing with fluctuating customer requirements, Dynamics Navision can slow your business down and let your competition win.

You can continue working on NAV, but you will be lacking with:

- ✓ Latest security updates
- ✓ Automation capabilities
- ✓ Seamless integration
- ✓ Cloud data security
- ✓ Easy scalability
- ✓ Centralized communication

This is the time you should accept cutting-edge technologies and accelerate your growth with Dynamics 365 Business Central.

## Boost Efficiency and Empower Growth with Business Central Upgrade Benefits

There are numerous benefits to moving from Dynamics NAV to Business Central, among which some are discussed next:

### Empower your Employees

#### Mobile Access

Access the sales data and track lead status using any device or browser.

#### Simplified Task

Leverage the embedded AI to automate and simplify various complex tasks.

#### Data-Driven Discussion

Avail real-time business insights to make actionable, data-driven decisions.

#### User-Friendly User Interface

Business Central offers a simple and intuitive user interface that's easy to use.

## Why Should You Choose Business Central Over Others?

Right now, there are various ERP solutions that claim to be the perfect ones. But Microsoft Dynamics 365 Business Central is an efficient and business-centric solution that comes with cutting-edge advanced features no one is offering in the market. Some of such features are:

### Upgrades Managed by Microsoft

In general, Microsoft releases important updates twice a year and 6-8 cumulative updates per year. Microsoft installs such updates totally free and without hampering the business.

### Automatic Updates and Upgrades

Being a partner-driven business, Microsoft automatically installs the updates, eliminating the need to chase a partner for any kind of change and resulting in cost savings.

### Pay-as-you-go Subscription Model

Microsoft has stopped selling business solutions with perpetual licenses, like Navision. Now, you can access **Microsoft Dynamics Business Central** with user-based licensing options for a monthly subscription fee.

### Resilient Data Security

Business Central comes in-built with disaster recovery, database recovery, data security with the trust of Azure (90+ certificates), a data center located in the same region, and a global Microsoft response team.

### Seamless Integration

You can enhance Dynamics Business Central performance by integrating native solutions from the **Microsoft Dynamics 365 Ecosystem** without any hassle.

### Lower Cost of Ownership by 50%

No need to buy BERP (business-ready enhancement plan) from Microsoft or any annual support plans from partners as an assurance of getting consistent support.

### Business Central Extension Technology

Integrate or disintegrate any add-on with just a click without losing any essential business data. It's like adding

### Bridge to the Cloud 2 Scheme

**Microsoft offers a 40% discount** on upgrading Dynamics NAV to Business Central for up to 3 years to users with an

## Upgrade to Business Central Today! Avail Seamless Automation and Centralized Communication

Microsoft Dynamics 365 Business Central adapts to changing business requirements, offering superiority to reduce competition and maximize output.

### Save Cost With Qualifying Licenses!

Microsoft offers a cost-effective way to save a lot of money by attaching qualifying licenses. With a single Dynamics 365 full-user license, you can attach another license at a much lower cost. Check out the table.

Dynamics 365 base licenses per user	Dynamics 365 attach licenses per user <sup>1</sup>											
	BC Essentials	Commerce	CS Ent	CS Pro	Field Svc	Finance	HR	Proj Oper.	RA	Sales Ent	Sales Pro	SCM
Business Central Essentials												
Business Central Premium												
Commerce												
Customer Service Enterprise (CS)												
Customer Service Professional (CS)												
Field Service												
Finance												
Guides												
Human Resources (HR)												
Microsoft Relationship Sales (MRS)												
Project Operations (Proj Oper.)												
Remote Assist (RA)												
Sales Enterprise												
Sales Premium												
Sales Professional												
Supply Chain Management (SCM)												

As per the above table, you can attach Business Central Essentials licenses to avail up to 60% off discount on licensing cost with a full user base license of Customer Service Enterprise (CS), Field Service, and Sales Enterprise.

Also, if you are planning to purchase the **Microsoft Dynamics 365 CRM** full user base license, you can easily attach Dynamics 365 Customer Service Pro or Sales Pro with it and save up to 65%.

**SAVE UPTO 60%**

on attach license
